Hidden frameless button

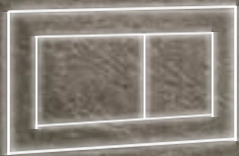

Ukryty przycisk bezramkowy – Pure Form

A minimalist, frameless flush plate that blends harmoniously into the tile surface. The complete lack of a frame creates a clean aesthetic and a modern, understated look. This solution is for those who value minimalism and the perfect integration of the flush plate into their bathroom décor..

Hidden button with LED backlight

modern style

Hidden button
with LED backlight
— modernity that brings
magic to your bathroom.

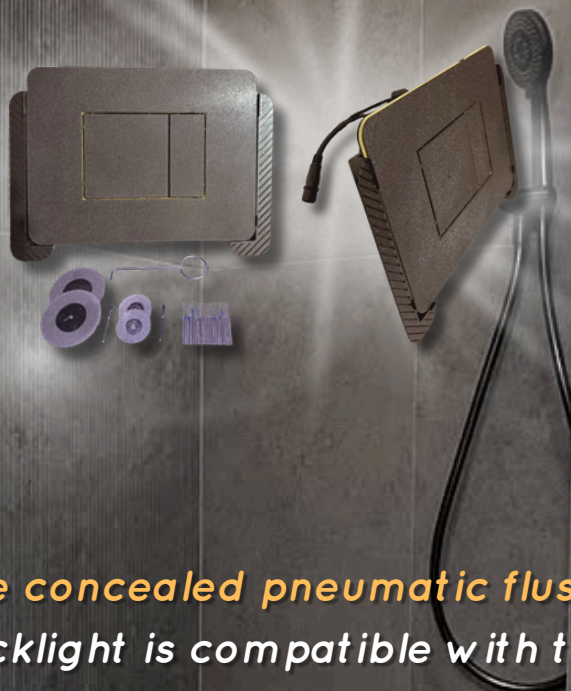

*It's not just a button,
it's emotion hidden in the detail.
We sell not only function
but also a feeling of modern style.*

The hidden LED button
was designed with dark tiles in mind –
blending into the design,
yet still noticeable when you want it to be.
A 3mm-wide LED runs along the entire frame
profile – both outside, highlighting the outline,
and inside, illuminating both keys. When the
main light is turned on, a subtle glow
highlights the minimalist design, perfectly
complementing the black tiles. The entire unit
is powered by 12V, ensuring stable and safe
backlight operation..

Pneumatic Modern Style

Hidden pneumatic button with LED backlight

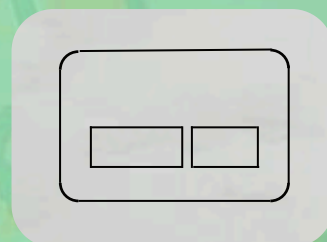

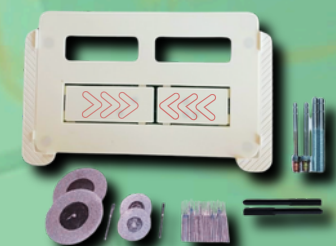

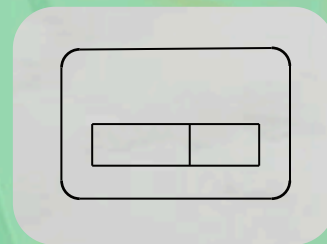

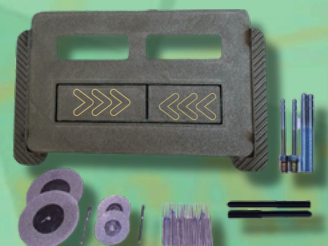

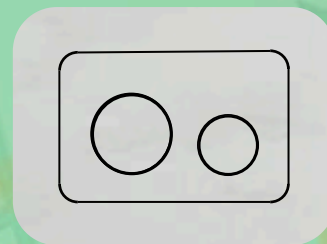

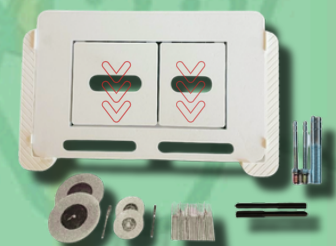

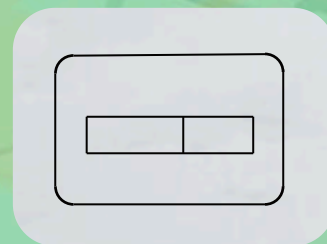

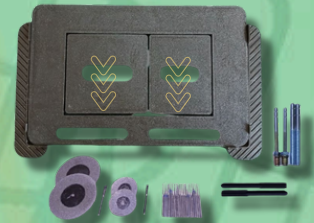

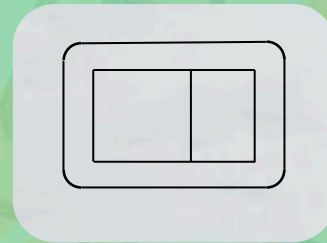

The concealed pneumatic flush plate with LED backlight is compatible with the Grohe system. By purchasing it, you gain not only a standard flush button but also a touch of delight and excitement in your bathroom.

This solution brings modern elegance and style, making every visit to the bathroom a unique experience.

The flush plate with LED backlight is powered by 12V. The LED strip is located on the outside edge of the flush plate and subtly illuminates the flush plate from the inside, emphasizing its shape and modern look.

**Hidden toilet buttons – perfect
for both light and dark tiles,
available in:**

Our hidden toilet buttons are available in classic colors – black and white – offering an elegant look and modern aesthetic,

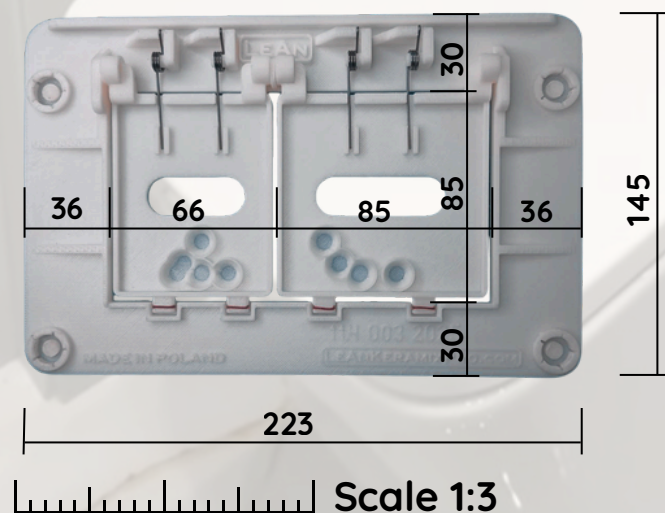

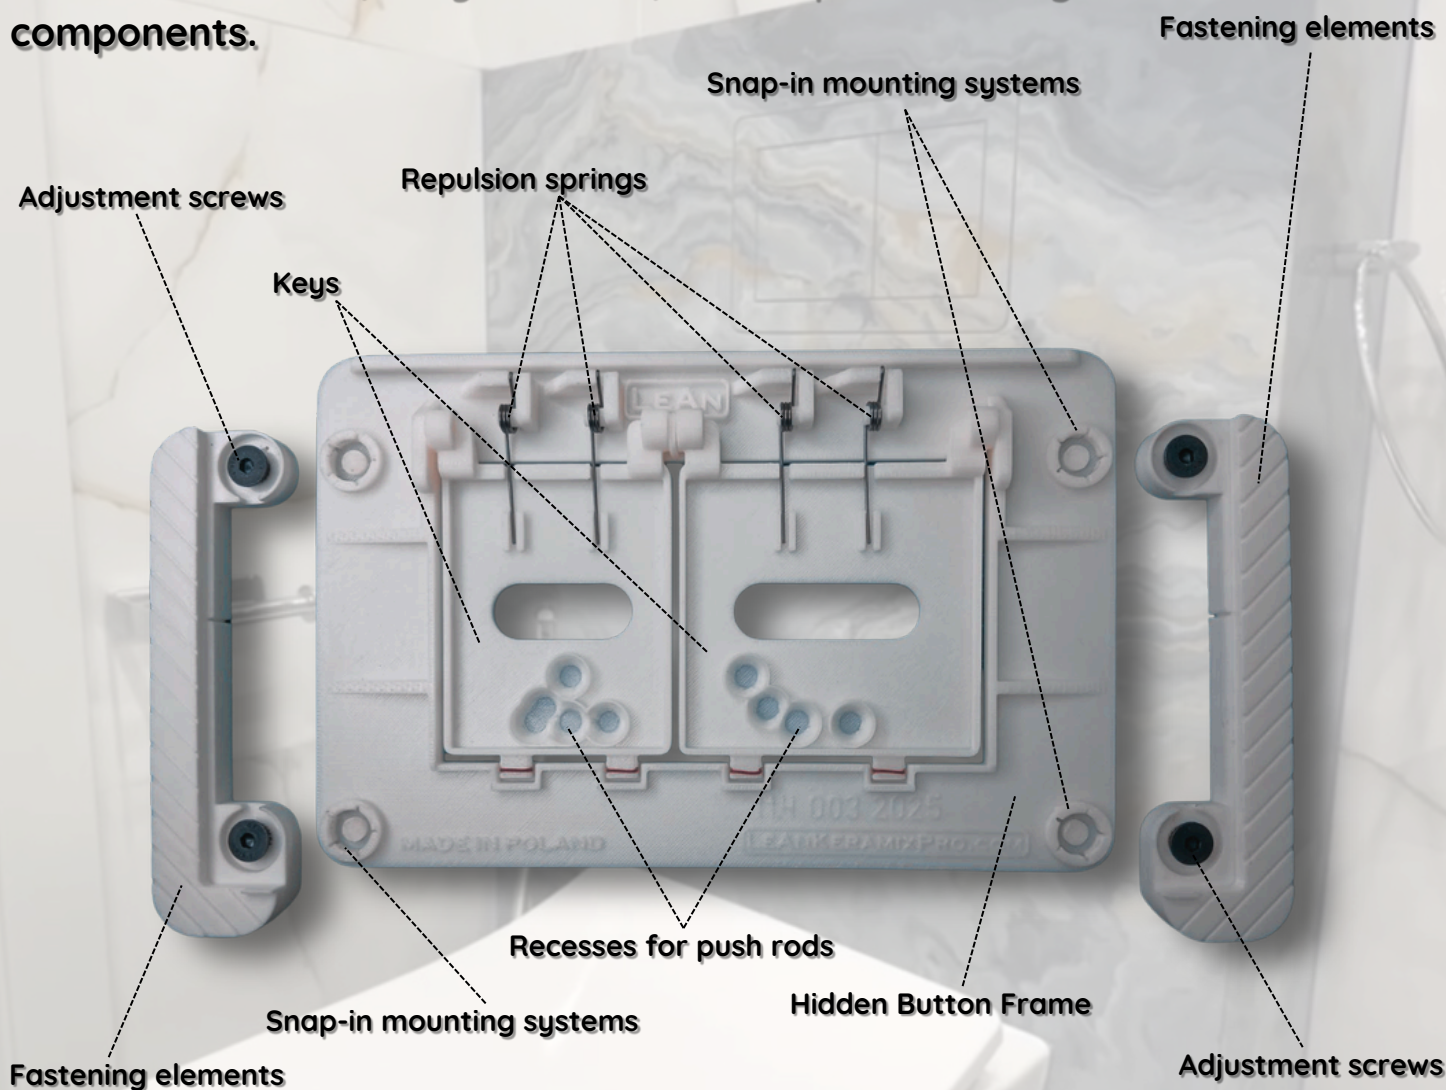

they perfectly complement tiles ranging from 6 to 10 mm thick. This makes them a perfect match for various types of tiles and provides additional advantages in terms of ease of installation and subtlety of workmanship.

VERSION WITHOUT MAGNETS

with narrow and wide keys, subtle, easy to install and aesthetically pleasing.

Hidden mechanical button with depth adjustment

The button plate shown on the back features a purely mechanical mounting system without the use of magnets. The mounting elements visible on the right and left sides of the frame allow for stable mounting of the button using only snap-in elements. This solution is reliable, easy to install, and requires no magnetic components.

Advantages of the mounting system

- Mechanical mounting:

The system is based on mechanical components, without the use of magnets, ensuring predictable and stable operation.

- Resistance to external conditions:

The mechanical structure withstands typical operating conditions well.

- Simple assembly and durability:

Easy installation and long service life thanks to robust mechanical components.

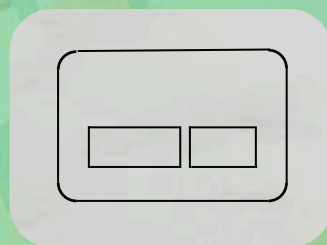

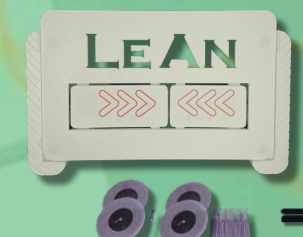

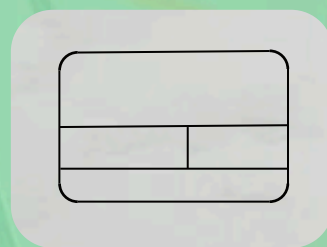

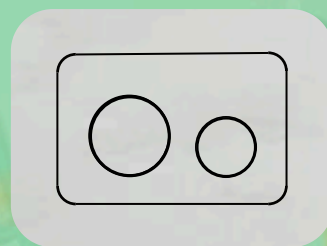

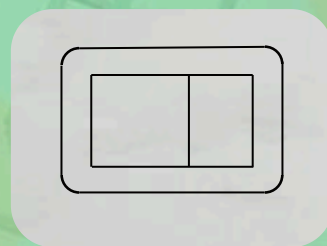

- Easy depth adjustment:

Using the adjustment screws, the mounting depth can be precisely adjusted to the wall thickness.

Hidden toilet buttons, now in a magnetic version, still blend perfectly with both light and dark tiles. While maintaining an elegant appearance and offering a variety of button widths, they provide even more

MAGNETIC VERSION

easier and more intuitive installation thanks to the use of magnets, as well as modern aesthetics.

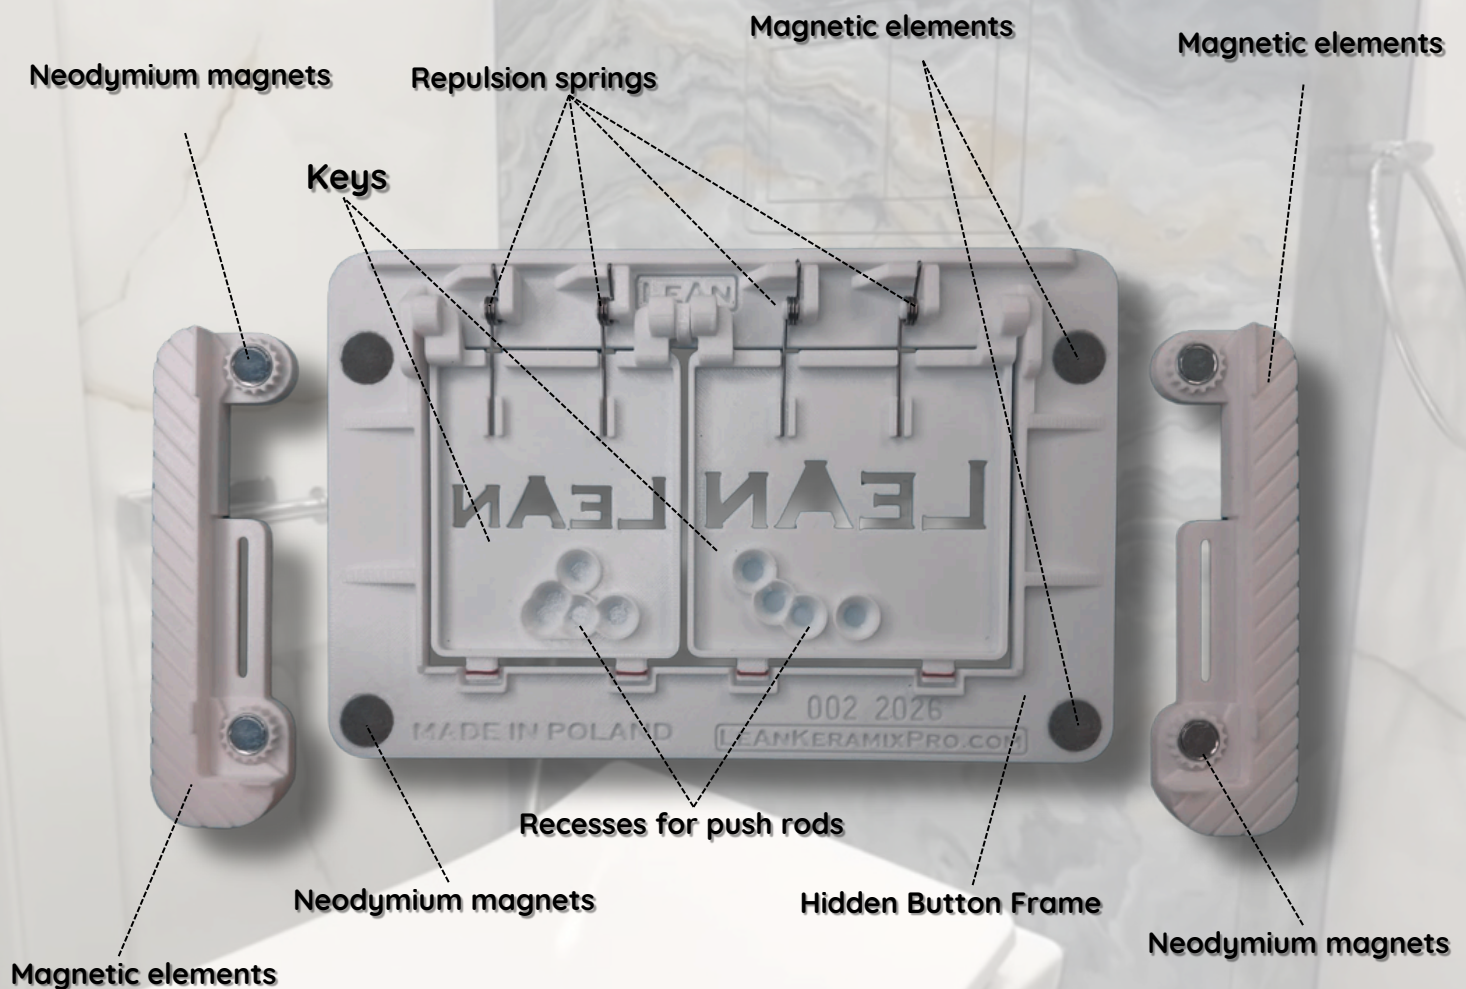

Our magnetic concealed toilet buttons are available in classic black and white, maintaining an elegant and modern aesthetic.,

They work perfectly with tiles ranging from 6 to 10 mm thick. Their magnetic mounting system ensures even greater ease of installation and a refined finish..

Hidden button magnetic version with depth adjustment

The magnetic button plate attached to the rear is equipped with a magnetic mounting system. On the right and left sides of the frame are visible steel magnetic elements, coated with a special anti-corrosion coating, beneath which are neodymium magnets. This combination ensures even stronger and more stable adhesion of the frame. On both sides of the frame are mounting elements with neodymium magnets, allowing for depth adjustment. This solution makes button installation much faster and more convenient, making the entire installation even more efficient.

Advantages of the Magnetic System

- Faster Installation

The magnetic system allows for much faster button installation.

- Stability and Secure Mounting

Thanks to the neodymium magnets, the button is held very firmly in place.

- Depth Adjustment

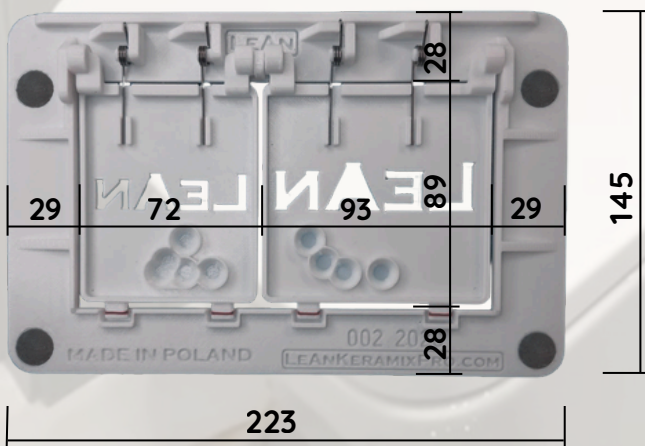

You can easily adjust the mounting depth to your needs.

- Greater Ease of Use

The entire system is more convenient for everyday use.

- Quick Access to the Interior

The magnets allow for quick button removal and easy access to the interior.

LEANKERAMIXPRO

NEW

HIDDEN PNEUMATIC FLUSH BUTTON FOR URINAL

FITTED TO GEBERIT DUOFIX FRAME

Minimalist look, precise depth adjustment and aesthetic under-tile installation.
A solution designed for modern bathrooms and a perfect finish.

DEPTH
ADJUSTMENT

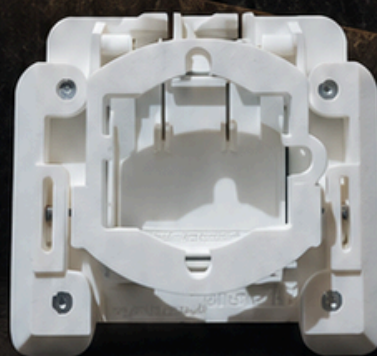

UNDER-TILE
INSTALLATION

COMPATIBLE WITH
GEBERIT DUOFIX

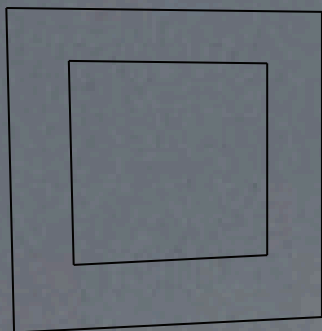

Original **GEBERIT** pneumatic mechanism is not included in the set.

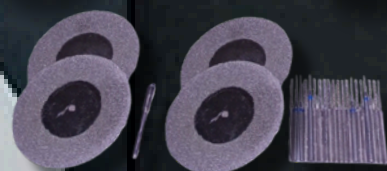

LeAn
KERAMIXPRO

Concealed mechanical button with depth adjustment

Concealed urinal flush button – now available in a pneumatic version. It fits perfectly with Geberit Duofix installation systems. It blends seamlessly with both light and dark tiles, maintaining an elegant appearance. Offering a choice of flush plate widths, it ensures easy, intuitive installation thanks to its pneumatic mechanism and modern aesthetic.

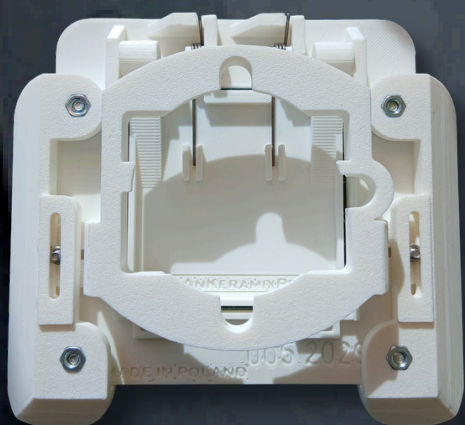

Give your bathroom a unique, minimalist look by replacing the standard plastic button with an elegant solution designed for installation beneath the ceramic tile. This concealed urinal flush button is designed for those who value a flawless finish and superior aesthetics. Once installed, only the subtle outline of the button remains visible, perfectly flush with the tile surface.

IMPORTANT – version exclusively for GEBERIT pneumatic flush buttons

This product is designed solely for GEBERIT pneumatic urinal flush buttons.

The original GEBERIT pneumatic mechanism is not included. If you have a standard urinal installation frame (e.g., GEBERIT Duofix), it typically comes factory-equipped with a mechanical flush button, which is incompatible with this product. To install the concealed button, you must separately purchase an original GEBERIT pneumatic flush button to obtain the factory pneumatic mechanism. This mechanism is then installed inside our housing. By using the original GEBERIT mechanism, you ensure full reliability and the manufacturer's standard of performance.

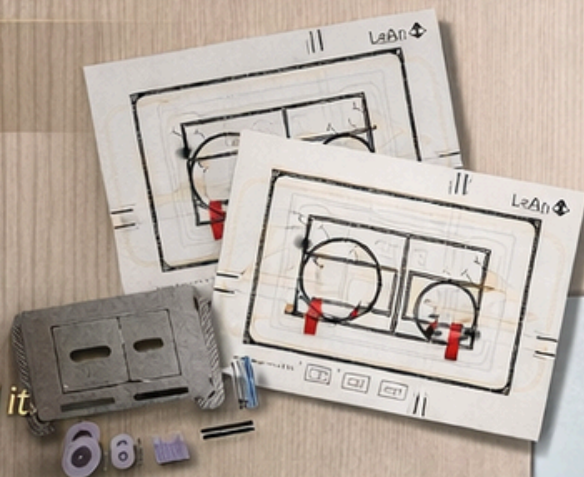

CONCEALED BUTTON FOR FURNITURE PANELS

HOT TREND 2026

Next-generation concealed solutions
for bathrooms and furniture

*Minimalism that disappears into the surface.
Technology that only reveals itself when you need it.*

LeAnKeramixPro®

Specialist in concealed solutions
for tiles & furniture

Why choose the concealed button by LeAnKeramixPro?

- ✓ **Perfect surface alignment**
The button integrates into the furniture panel after installation – no frames, no protruding parts.
- ✓ **Clean design and modern aesthetics**
Solution created for premium projects, modern bathrooms and minimalist interiors.
- ✓ **Precise mechanics – no magnets**
Proprietary, mechanical construction that ensures reliable operation and long service life.
- ✓ **Compatible with popular toilet systems**
Universal solution adapted to many in-wall toilet frames,
- ✓ **Solution for professionals**
Product designed for designers, carpenters, and installers who value quality and details.
- ✓ **Product of the future – trend 2026**
Concealed buttons are the direction in which modern interior design is heading.

Precise installation

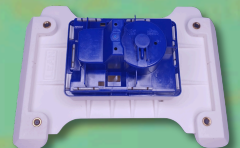

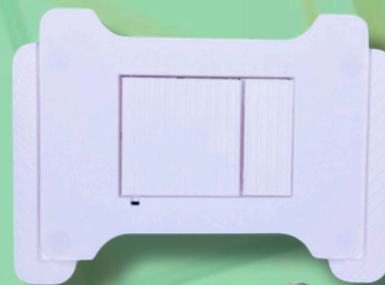

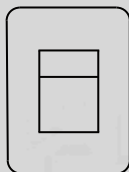

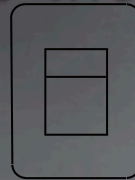

Before installation, back milling on the rear side of the furniture panel must be performed to reduce the material thickness at the button installation spot to 10 mm, ensuring perfect self-alignment.

LeAnKeramixPro – hidden solutions that make a difference.

A set of hidden buttons adapted to the pneumatic system

The **black pneumatic** button fits perfectly with ceramic tiles 6 to 10 millimeters thick. It can also be easily adjusted to fit stone up to 20 millimeters thick, as well as furniture boards of similar thickness.

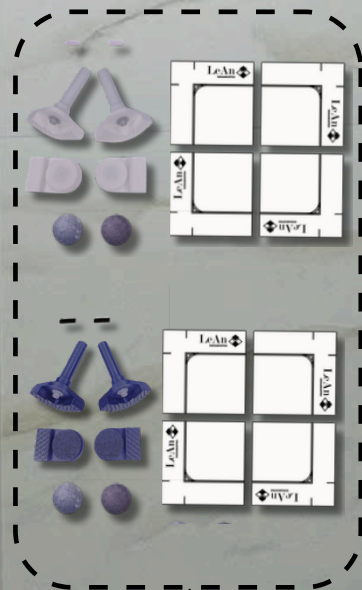

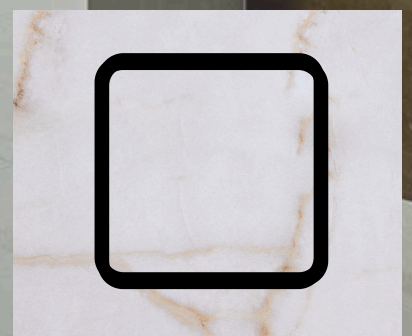

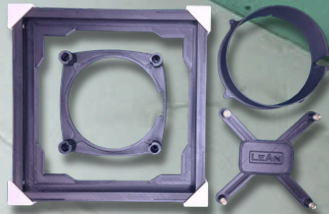

The **white pneumatic** flush plate adds an elegant and fresh touch to any décor. It's perfectly suited to ceramic tiles 6 to 10 millimeters thick, and can also be adjusted to accommodate stone up to 20 millimeters thick, as well as furniture boards of similar thickness..

Hidden ventilation under the tiles

- fan diameter: 100 mm,
elegant, easy to install,
air flow: 107 m³/h,
possibility of connecting
an LED strip

- fan diameter: 125 mm,
discreet, easy to install,
air flow: 190 m³/h,
possibility of connecting
an LED strip

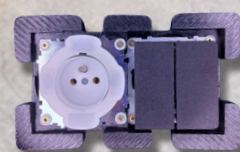

The concealed access door blends seamlessly into the wall, perfectly replicating the tile pattern, and provides convenient access to the interior. Available in both white and black, it easily complements a variety of interior designs.

HIDDEN SOCKETS

Invisible power. Absolute aesthetics.

THE 2026 INTERIOR TREND

Concealed electrical solutions
for modern kitchens

INTERIOR TREND REPORT 2026

Hidden sockets are no longer an option —
they are the new standard.

Design that does not distract
Technology that stays hidden. Style that says visible.

WHY HIDDEN SOCKETS ARE THE FUTURE

- **Invisible by design:** Sockets are perfectly integrated into the wall surface and disappear in the interior.
- **Pure minimalism:** No plastic frames, no visual noise — only clean lines and architectural order.
- **Seamless integration:** Flush-mounted with the wall finish, stone or tile. One plane. One surface.
- **Premium functionality:** Full power access without compromising the design concept.
- **Designed for modern living:** Ideal for kitchens, living spaces and high-end interiors where details matter.

HIDDEN HOOKS

STANDARD VERSION

INNOVATIONS AND NEW PRODUCTS

FOR 2026 - ALWAYS ONE STEP AHEAD

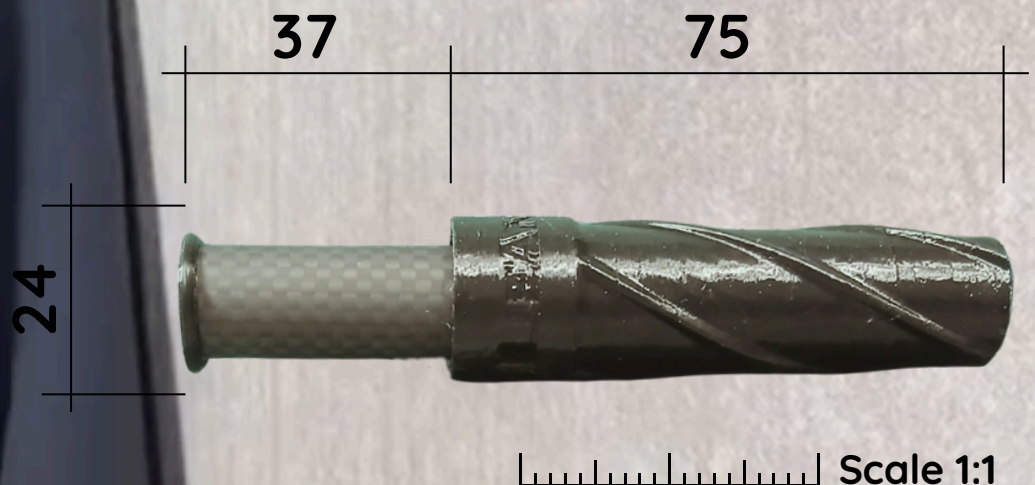

The **STANDARD** version of the hidden hooks offers subtle elegance and functionality. The 75 mm deep base ensures stability, while the 37 mm long extendable hook section adds convenience.

The extendable hook section is made of carbon fiber tubing, ensuring exceptional durability.

This version is a universal choice for those who value classic solutions and aesthetic cohesion with the hidden plate.

Application:

- Perfect for the bathroom
- In the shower, by the bathtub, next to the sink, and in the kitchen
- anywhere the surface is tiled.

HIDDEN HOOKS

ULTRA VERSION

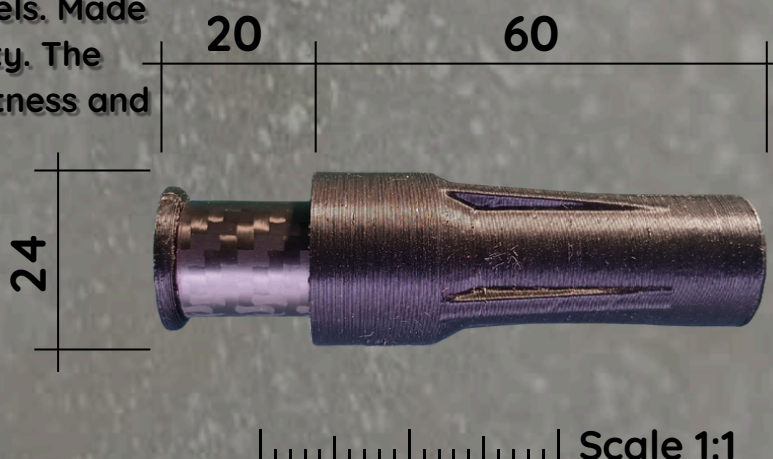

INNOVATIONS AND NEW PRODUCTS
FOR 2026 - ALWAYS ONE STEP AHEAD

The Ultra version of the hidden towel rails offers a new level of convenience. A shorter design, but the same diameter, perfectly fitting towels. Made of carbon, they provide greater durability. The new version also offers exceptional quietness and everyday comfort.

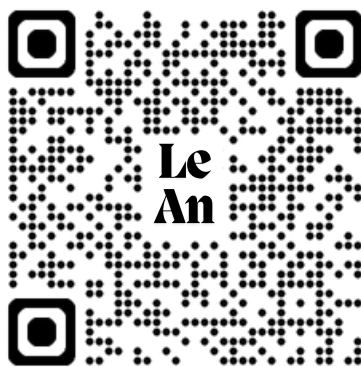

Application:

- The product is perfect for bathrooms.
- near sinks, showers, as well as in kitchens and modern architectural designs.
